

To Whom It May Concern,

WebDev Technologies recently built an e-commerce site for my tea and teaware business.

---

Working within my schedule and budget, the team at WebDev successfully completed the project to my satisfaction. They are also very meticulous in testing the shopping cart function and the integration with credit card processing account.

Mr. Sumon Khan is always prompt in responding to any questions or problems. His guarantee of service after completion is an indication of attention to quality control and customer care.

I would highly recommend WebDev for any web development projects. I may be contacted at 1-888-892-9619 or [lawrencel@naivetea.com](mailto:lawrencel@naivetea.com) for any further information regarding my experience with WebDev Technologies.

Sincerely,

Lawrence Lai  
Founder and President
