

To whom it may concern;

I have worked with Sumon and his WebDev team for the last year now, and I wanted to write a letter to them, and potentially anyone looking at them as a vendor. Sumon and his team have been phenomenal in their service, execution, and project management. They have always completed projects on time and at the initial cost that I was quoted. Their communication as they are working on the items, is exceptional and thorough, Sumon or anyone from his team have always let me know if there an issue, roadblock, or clarification that is needed.

I will continue to use him and his team as our company and site grow – thank you guys for the great work!!
